

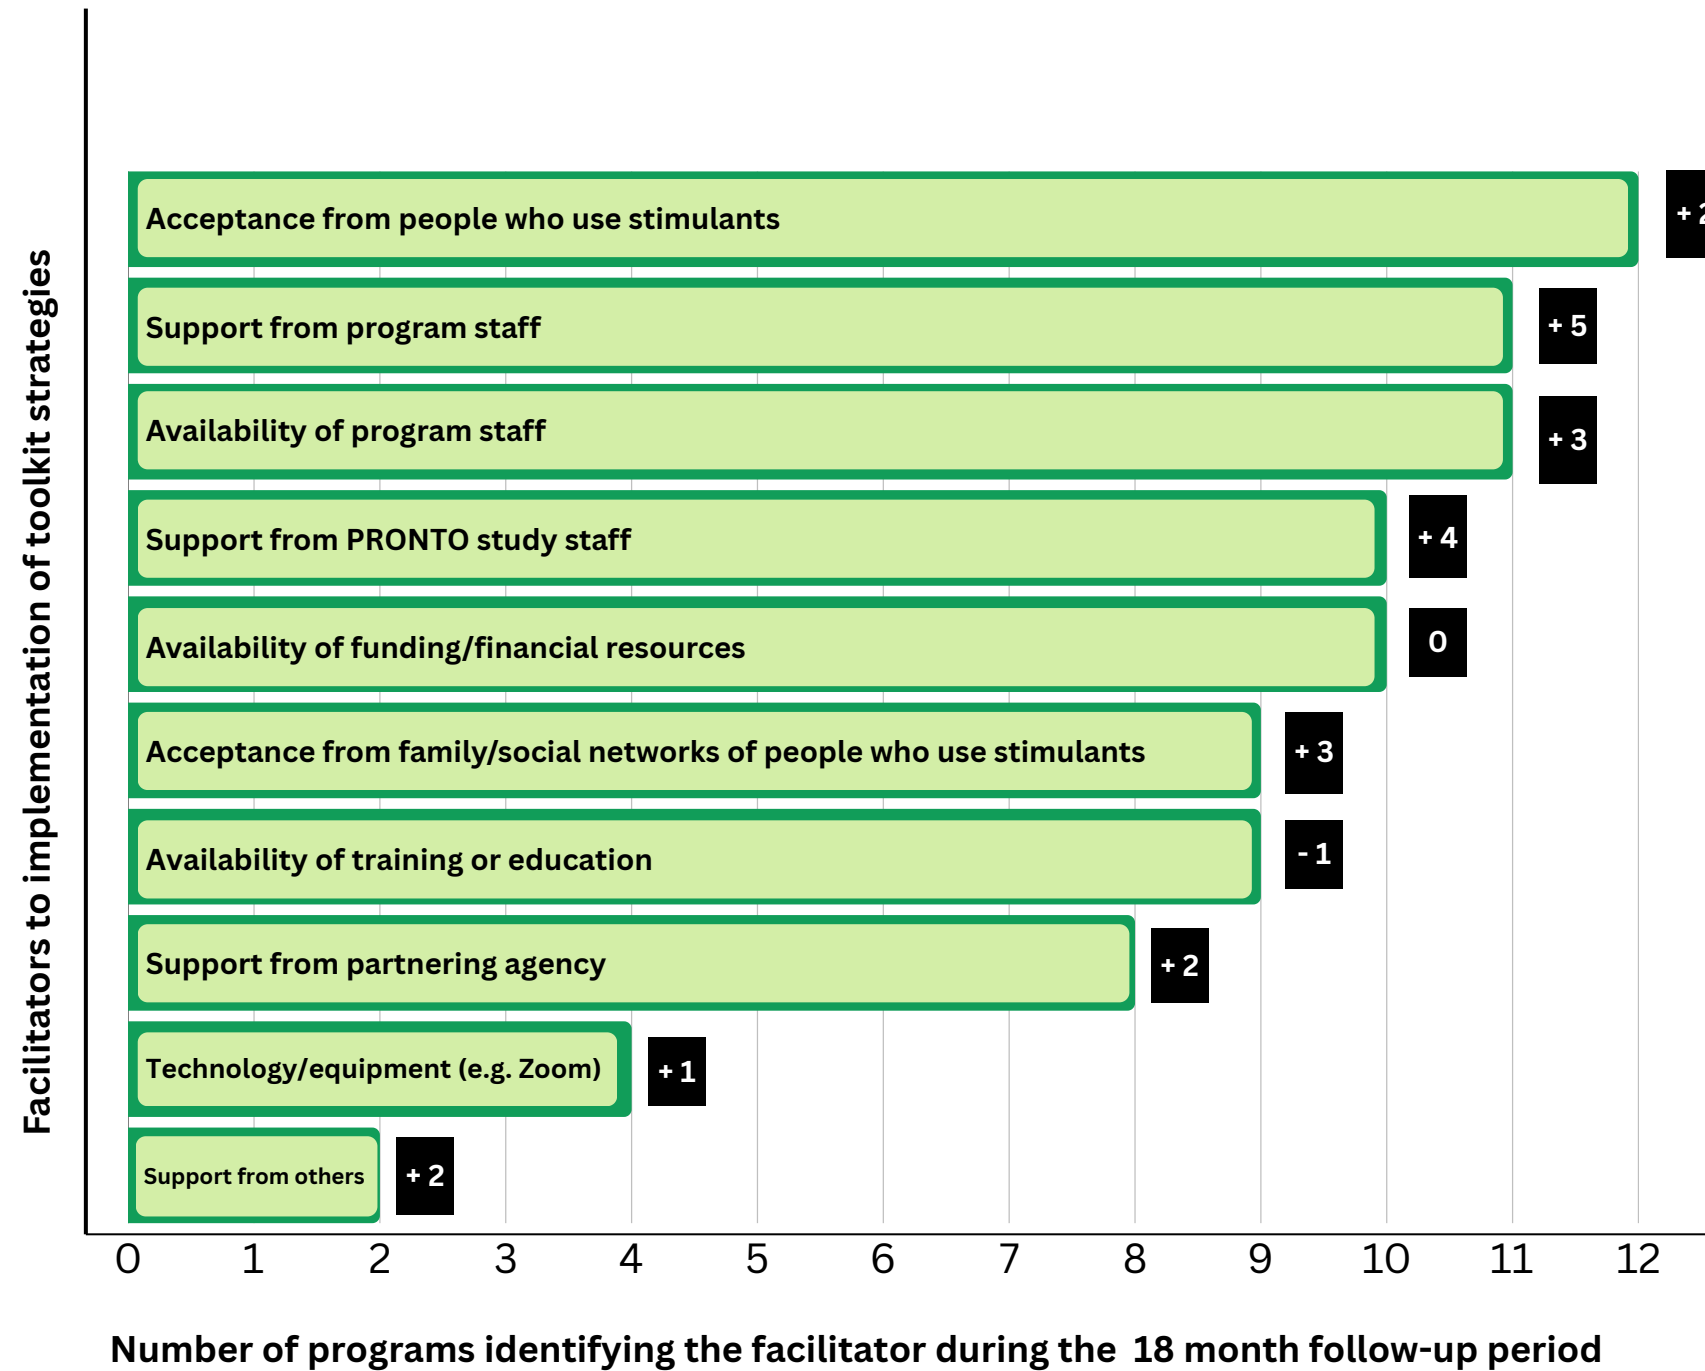

Figure 2. Changes over 18 months in reported facilitators and barriers to implementation of stimulant-responsive post overdose strategies among 12 post-overdoses outreach programs in Massachusetts

Figure A. Implementation facilitators of stimulant responsive toolkit strategies among 12 post-overdose outreach programs in Massachusetts (Over 18 months)

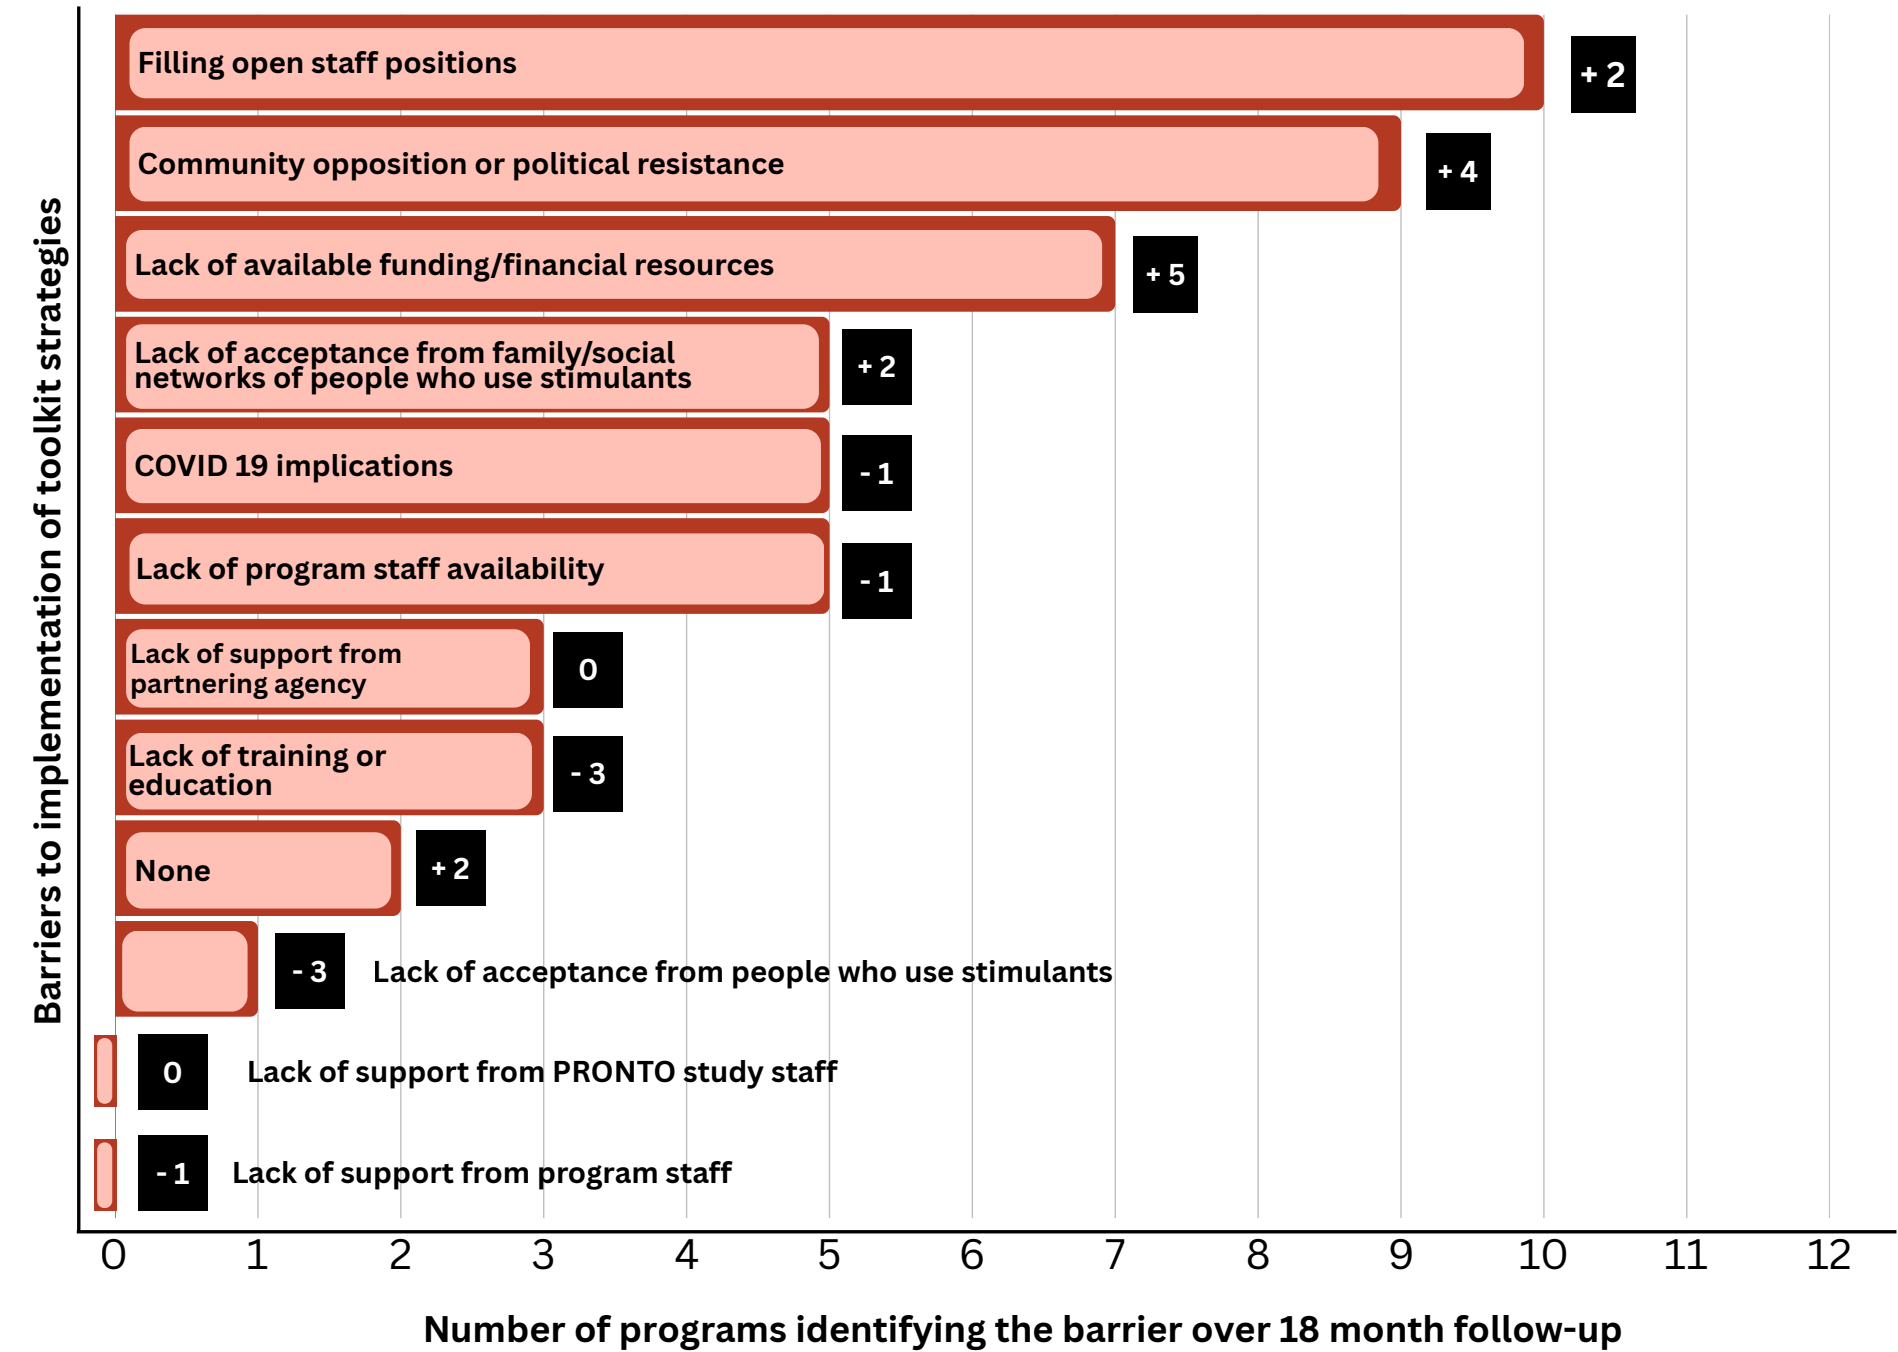

Key

= The number of programs that identified the specific implementation facilitator at 18 month follow-up

± N = The change in the number of programs that identified the specific implementation facilitator between baseline and the 18 month follow-up

Figure B. Implementation barriers of stimulant responsive toolkit strategies among 12 post-overdose outreach programs in Massachusetts (Over 18 months)

Key

= The number of programs that identified the specific implementation barrier at 18 month follow-up

± N = The change in the number of programs that identified the specific implementation barrier between baseline and the 18 month follow-up

Figure 3. Changes over 18 months in reported facilitators and barriers to implementation of stimulant-responsive post overdose trainings among 12 post-overdoses outreach programs in Massachusetts

Figure A. Implementation facilitators of stimulant responsive toolkit trainings among 12 post-overdose outreach programs in Massachusetts (Over 18 months)

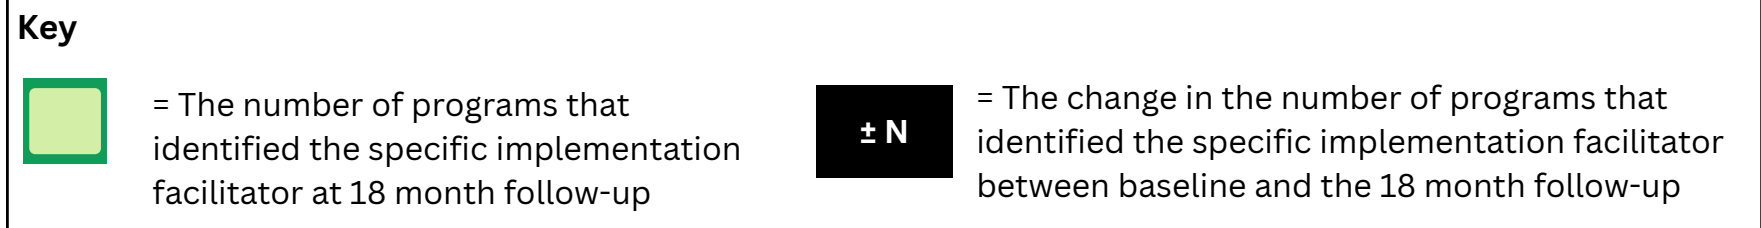

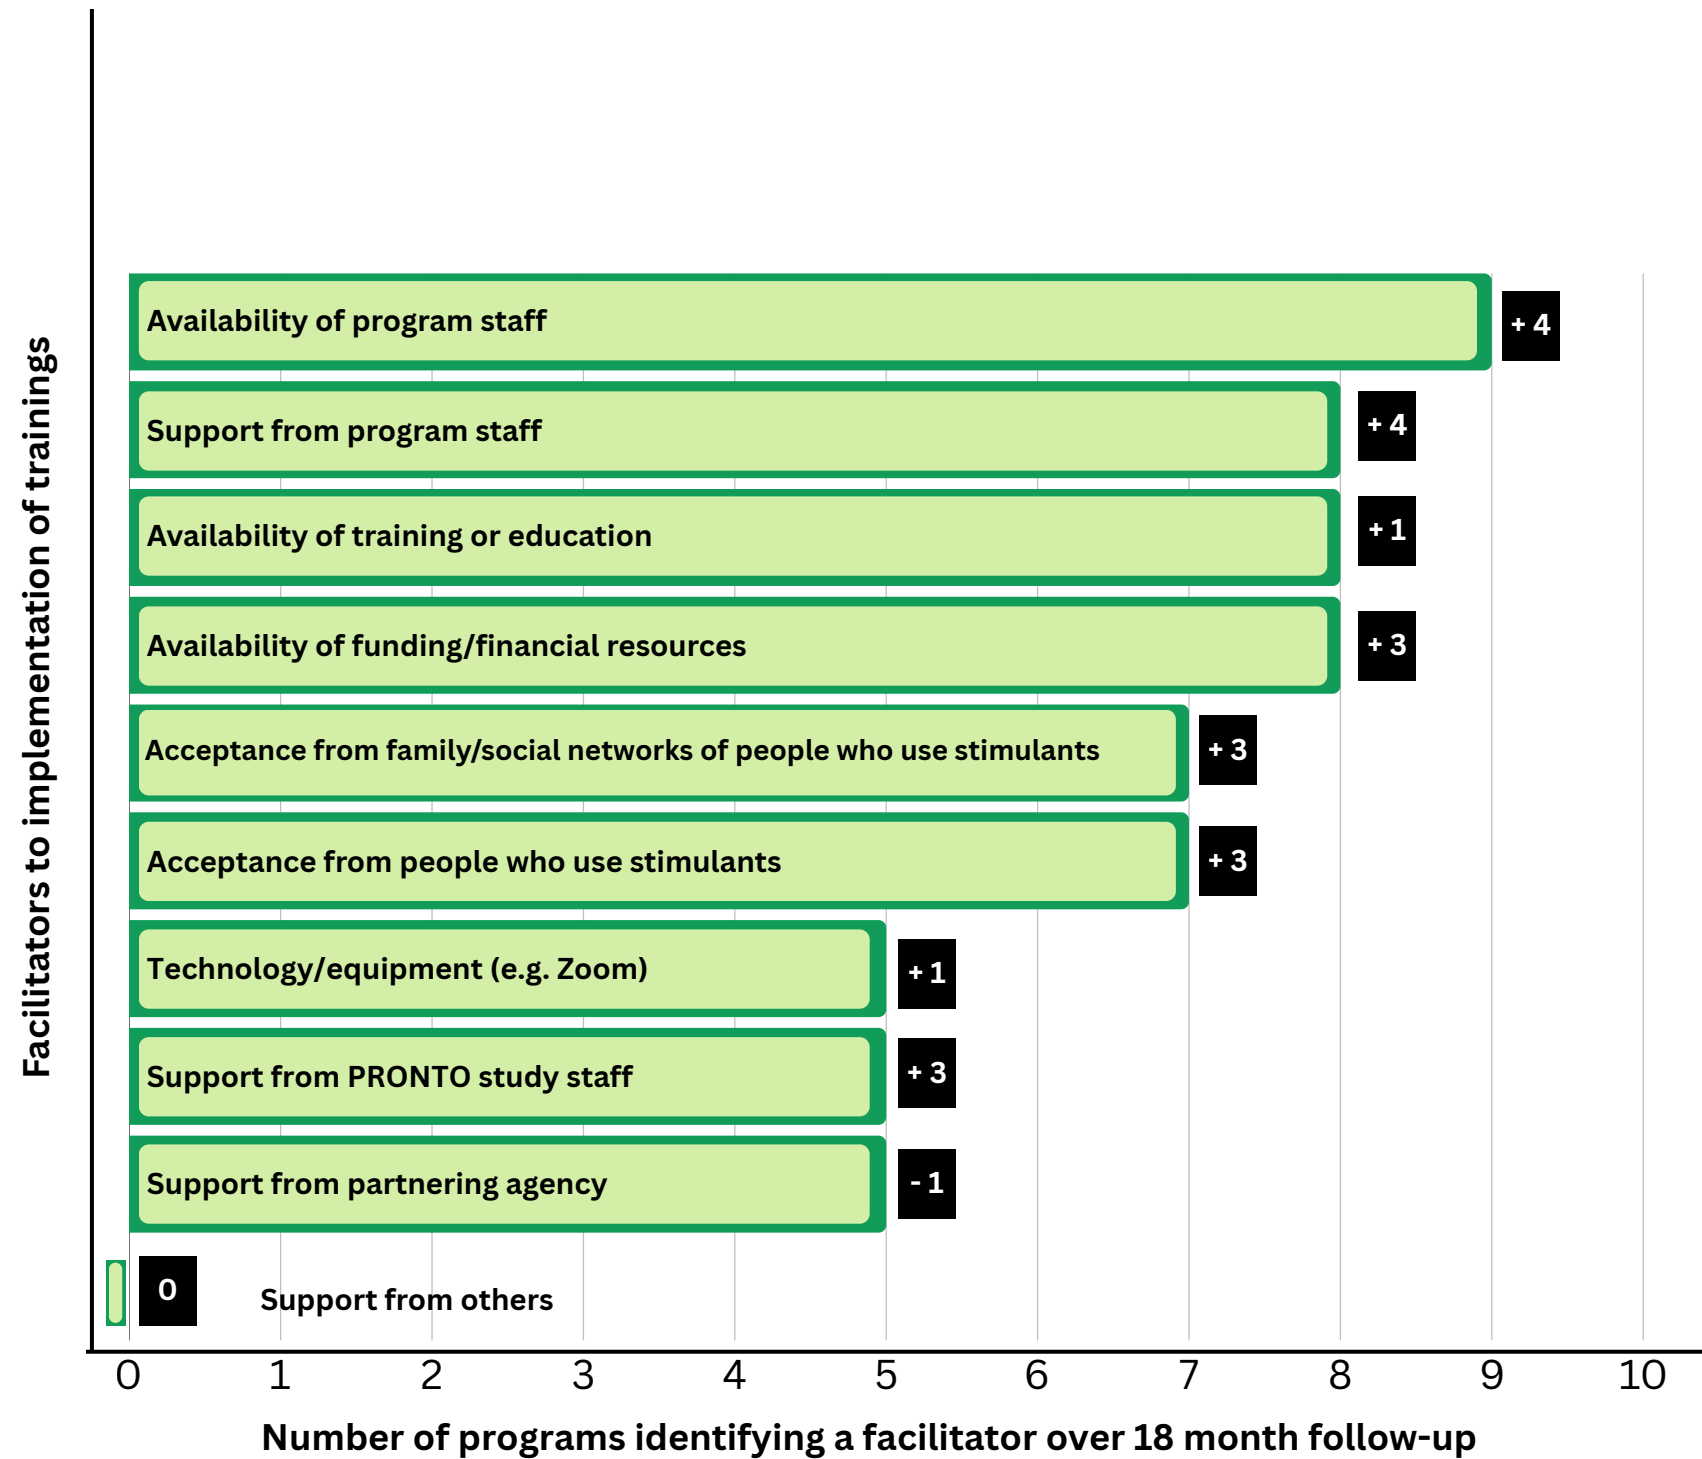

Figure B. Implementation barriers of stimulant responsive toolkit trainings among 12 post-overdose outreach programs in Massachusetts (Over 18 months)
